Gainesville, FL 32601

Attn: Mr. Jason Gonos  
Director

Dear Jason,

I want to express how satisfied with all of the Solar Photovoltaic Panel Systems that you have installed for me.

You have installed three (3) systems on my properties. One system, on my commercial property, in the Northwest Commercial Park, in Gainesville Florida. One system, on my home in Blues Creek Subdivision, in Gainesville Florida, and another one, on my retreat home, on the Withlacoochee River in Inglis Florida.

I am completely satisfied with all the work that you have performed for me. You and your partner Alex Khokhlov, have exceeded all of my expectations. The quality of your companies work is top notch. Your employees are not only knowledgeable, but were also courteous and conscientious of the existing conditions of each of these three properties. Your company performed on time on all three of these projects.

I am also extremely impressed with your “service after the sale”. I was actually surprised to find out that your company “monitors” each and every system after they were completed, informed me of a problem, and immediately took care of it.

Your guidance throughout the process of permitting, contract processing with the electrical municipalities, research and understanding of the tax incentives, rebates and other issues involving the Solar Photovoltaic Panel systems was excellent. I would highly recommend your company to anyone that is smart enough to consider this energy solution to today’s high cost of electricity. All three systems are producing more energy than your predictions.

Please feel free to use me as a contact for discussion for any of your new clients.

Sincerely,

Brent Salley  
President
